DETAILED ACTION

This Office Action is in response to the amendment filed February 6, 2006. Because of the allowance of the generic claims, the Applicant is entitled to consideration of claims to additional species written in dependent format that were previously restricted, as provided by 37 CFR 1.141. See also, MPEP 821.04. This includes claims 5-7, 11-12, and 19-20.

EXAMINER'S AMENDMENT

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In Figure 3, numeral 120 pointing to the biasing spring has been changed to numeral 121 ; in Figure 4C, numeral 120 pointing to the biasing spring has been changed to numeral 121. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The application has been amended as follows:

Specification, page 12, line 21: "spring 120" has been changed to read "spring 121".

Allowable Subject Matter

Claims **1-20** are allowed. The prior art does not disclose or fairly suggest a motivation to incorporate a handle, a lever member moveable in opposite directions relative to the handle for effecting or causing actuation of a force transmitting member, a locking and release mechanism operably connecting the lever member to the force transmitting member, and wherein the lever member operates the locking and release mechanism, which locks movement when the lever moves in one direction but releases movement when the lever moves in the opposite direction.
